

# ARC Light® IIM

XENON ARC CURING AND BLEACHING SYSTEM

## Time is of the Essence.

Imagine the advantages. Cure, bleach, cement and restore with the ARC Light® IIM. Manage time, your most important asset, much more efficiently. Satisfy your patients with full restoration integrity and shorter appointments.

# ARC Light® IIM

XENON ARC CURING AND BLEACHING SYSTEM

## Remarkably Quick

The ARC Light® IIM cures all composites in 5 seconds or less. By saving substantial and measurable time previously consumed by long curing cycles, ARC Light® IIM allows you to make new choices for your practice.

## Total Light Control

The ARC Light® IIM features the widest range of preset and user programmable modes to insure compatibility with any curing protocol. Light intensity, time and energy profile are fully adjustable. Cure Mode, Bleach Mode, Custom Program Ramp and Step Modes can all be selected with continuous or modulated light output. The unique Modulation Function reduces heat transfer without extending the curing time.

## Materials Compatibility

Use flowable resins, composites and adhesives with complete confidence. Restorative materials cured with ARC Light® IIM exhibit no additional shrinkage, brittleness or stress.

## Operational Enhancements

The ARC Light® IIM features a built-in Radiometer for accurate, automatic calibration. Light is activated by a unique floating magnetic switch on the handpiece. Easy to use, this switch turns the lamp off automatically when released. Additional safety elements include a key switch and an interlock to prevent lamp actuation when the handpiece is in the holder.

## Specifications

Energy Output:	Variable to 2000mw/cm2
Spectral Emission Range:	400-500nm
Curing Cycles:	1 through 20 seconds
Bleaching Cycles:	1 through 60 seconds
Liquid Light Guide:	5.5'
Tip Diameters:	3.5mm, 8mm, 11mm
Dimensions HxWxD:	5.7" x 10.5" x 11.2"
Weight:	10 lbs.
Electrical:	100-240V, 50-60Hz
Warranty:	1 Year, 5 Years limited on lamp.

Not just another curing light, ARC Light® IIM exceeds the most stringent selection criteria for speed of cure, restoration integrity, bulb life, curing consistency and cost of ownership.
