

Fuji Extraoral Dental Film

Super HR-T 30 offers significant performance advantages.

- This film uses Fuji Super Thin LIC-30 grain technology. Produces ultra-high resolution, fine grain images with high contrast - ideal for dentistry.
- Super HR-T 30 is a green light sensitive film. Green light sensitive film a newer and more popular technology than "Blue speed" films. Use Super HR-T 30 in conjunction with green light emitting intensifying screens.
- Increased resistance to handling marks.
- Anti-static properties help reduce the incidence of static mark artifacts on the film.
- Highly repeatable, consistent processing results, from image to image, lot to lot.
- Compare - the noticeably bluer tint of the film base facilitates easier image viewing.

Air Techniques is an authorized U.S. distributor for Fuji Super HR-T 30 Dental film.
